Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Nelb ('094).

Patentee discloses a process for preparing high molecular weight polyamides, copolyamides, and/or polyester-amide block copolymers by melt-mixing a lower molecular weight polyamide, copolyamide, or polyester-amide with a cycloaliphatic or aromatic diisocyanate blocked with phenol, lactam, alcohol, or oxime blocking agents (Abstract, col 1 lines 7-12, col 4 lines 30-33, 53-56, 60-63). Furthermore, Nelb teaches that the diisocyanate is present in amounts that overlap the claimed range, and the mixing is performed in a twin-screw extruder (Col 15 lines 48-50, and 59-61).

Response to Amendment

2. Applicant's remarks and amendments have been fully considered but are not persuasive. Nelb discloses that the chain extending diisocyanate acts as the chain extender by reacting with the terminal carboxyl groups of the polyamide polymer (Col 2 lines 63+, col 3 lines 1-3). Furthermore, on column 4 lines 53-57, patentee discloses that 100 percent of the chain-extending diisocyanate compounds can be blocked, therefore the amount of diisocyanate disclosed by Nelb on column 15 lines 48-50, encompasses the claimed amount.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Al Ghatta, U.S. Patent No 5,376,734, shows a process for preparing high molecular weight polyester by melt-mixing low molecular weight polyesters with 0.05-2 wt%

Diphenylmethane diisocyanate in a twin screw extruder.

4. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a). A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
